# WM. H. JACKSON COMPANY,

## ARTISANS IN ALL METALS

## BRONZE, BRASS AND IRON.

**Warerooms, 29 E. 17th Street, Union Square, New York City**

Chicago Office, 163 Michigan Avenue

**Factories, 229 to 239 West 28th Street**
232 to 240 West 29th Street

NEW YORK CITY

N. B. AFTER JANUARY 1, 1912, WE WILL OCCUPY OUR NEW WAREROOMS AT NO. 2, 4 & 6 WEST 47TH STREET NEAR FIFTH AVENUE

---

For over eighty years we have been making Art Metal Work; commencing with special work for the open fireplace, then branching out into the larger field, and for a number of years making a specialty of Ornamental Bronze and Iron Work, consisting of Bank Counter Screens, Partitions, Grilles, Stair Work, Bronze Memorial Tablets and Statuary Work; also Entrances, Railings, Fence Work, etc. for private houses.

We have never issued a catalogue, as all our work has been made from special designs. The photographic reproductions herein are taken from some of our special work, which we desire to submit for your consideration.

It is impossible to give in this collection anything like a complete reproduction of what we have furnished, and it has been difficult to make a selection, as we have many other examples as artistic as those shown.

We have photographed and submit the following simply to illustrate the high character of our work:—
1st. The manner in which we have carried out the individuality of the designer.
2nd. The feeling and spirit with which we have executed the work.
3rd. The excellence of construction and materials.

We endeavor always to employ Artisans in all branches of the work, in our Modeling Rooms, Pattern Rooms, Foundries, Shops and Plating Rooms.

Our workmen are of high ability and intelligence, many of them having been in our employ for many years.

We take the crude materials, alloy them in our works, and produce the finished article in any metal, reproducing all the antique or modern finishes, and justly claim to be ARTISANS IN ALL METALS.

---

We will submit estimates from scale drawings, and if required, will make the full size working drawings and submit for your approval.

We give especial attention to construction in order that our work, when finished, will be strong and substantial.

We make templets and furnish duplicates to the other tradesmen when necessary, to insure accurate work. Our work is set up complete in our shops before sending out, thus avoiding mistakes, confusion or delay in setting at the building.

On the following page is given a partial list of buildings for which we have executed fine metal work.

# AIR-TIGHT AND DUST-PROOF WINDOWS

PATENTED

# TO ARCHITECTS, CONTRACTORS AND OWNERS.

We have designed, perfected and patented a really **AIR-TIGHT AND DUST-PROOF WINDOW** which will undoubtedly appeal to you.
It is known in the building trades that there has always been a demand for such a window and that hitherto none of the so-called air-tight windows has been successful.
Having supplied and placed our windows in some prominent buildings where a strictly air-tight and dust-proof window was specified, and having met with entire success, we can assure you that these windows are not an experiment, and we guarantee them to be what they are called—**AIR-TIGHT AND DUST-PROOF.**
They are simple in construction, with no complicated parts or machinery to get out of order, and are readily **ADAPTED TO ARCHITECTURAL DESIGNS.**
Their **SIMPLICITY AND EFFICIENCY** make them suitable to every kind of building where a strictly reliable article is required.
No window too large.
No window too small.
We can furnish any size, carrying out your own architectural feature, and they will be air-tight.
Any size can be opened or closed without effort.
They are absolutely secure against storms and always locked when closed.
No springs, no rattle or noise whatever.
Does away with all the old devices of complicated hardware.
No weather strips or other unsightly devices.
We are making our **AIR-TIGHT AND DUST-PROOF WINDOWS IN BRONZE, WOOD AND KALAMEIN.**
If made in metal they are **ALSO FIRE-PROOF.**
Some of the advantageous points concerning our windows:
They are air-tight and dust-proof,
Not expensive,
Quickly made,
Strongly built,
Easily operated,
Do not get out of order.
Sash easily removed,
No friction but simple contact.
It does not cost any more to have these windows than to have others that are not air-tight and dust-proof.
These windows may be seen at any time at our factory, where we shall be pleased to show you their practical and simple operation, and to demonstrate their efficiency under heavy air pressure.
We invite the inspection of **ARCHITECTS, BUILDERS AND OWNERS.**

**WM. H. JACKSON COMPANY**
